DETAILED ACTION

Election/Restrictions

Note that the following requirement is made in view of the indicated allowability of claims 1-3 being withdrawn. See below.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Figures 1A-1E

Species II: Figures 2A-2C

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Allowable Subject Matter

The indicated allowability of claims 1-3 is withdrawn in view of Satterfield (US 6,098,245) and/or Norbury, Jr. being readable on at least claims 1-3.

Both Satterfield and Norbury, Jr. could be applied to at least claims 1-3 in the following manner. The vacuum bag would constitute the inflatable product (chamber), the air pump includes an air intake (suction side of fan/blower) and an air outlet (discharge side of fan/blower). And the pump could be physically positioned in one position such that the air intake is connected to the outside of the chamber and the air outlet is connected to the inside of the chamber, and in another position such that the air intake is connected to the inside of the chamber and the air outlet is connected to the

outside of the chamber. Both Satterfield et al's housing and Norbury, Jr.'s housing can be considered "substantially rolling-pin-shaped", and the air intake and air outlet are provided on ends of their respective housings.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M. Hewitt whose telephone number is 571-272-7084.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Stodola can be reached on 571-272-7087. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
